

It has come to my attention that the FCC is proposing to expand the LPFM broadcast service and give this service priority over current FM translator services such as K-LOVE, which we listen to on 88.1 in Omaha, and 91.9 in Lincoln. K-LOVE radio is one of only two radio stations that my family and I listen to. Their broadcast is extremely important to our family and our community. It is one of the very few stations that my entire family can listen to without me, as a parent, having to worry about what will be heard. I have noticed many citizens in my community that display their K-LOVE bumper stickers, etc. and mention how positive and effective their broadcasting services are to our community. I feel that if K-LOVE were to be displaced by an LPFM broadcaster providing other programming, it would have a major negative effect on our local community. We all need to have a positive and encouraging station in our communities; just like what K-LOVE provides. The service that K-LOVE provides is not one of selfishness or to make a buck, but they are here to help encourage and build up the local communities that receive their signal. Their service has been invaluable to my family and me, and I hope and pray that you will not remove this positive service from our local communities, but instead ensure that this station, and others like it will not be displaced.
